Traffic Management:

Our traffic management arrangements are shown on the website linked at the bottom of this page.

We aim to minimise any disruption to residents while the works are taking place and would like to remind you that the businesses on Hathernware industrial estate remain open throughout the works.

Local area flood plan has been completed in anticipation of possible adverse weather impacting current traffic management arrangements.

Traffic management was removed in response to the flood plan during the amber weather alert in the week of 10th November.

Community Engagement:

We have undertaken the following community engagement over the past month:

- Regular sessions with local councillors have been set up to provide updates and assurances over the works every 4 weeks.
- Follow-up session for neighbours immediately adjacent to the bridge was held on 26/11, presentation slides available on the Kirk Hill project website.
